ATTENTION JACO PIETERSE AND MOYO NDUKWANA

1. Toska, though on a running line, wraps herself around the tree and cannot access her water, as we witnessed yesterday in the 36 degree heat. I shudder to think of all the times this has happened and this poor dog is deprived of water because of something so simple. We gave a spinny thing so that her chain doesn't twist up but APPARENTLY she broke it after a few days. To add insult to injury her owners keep shortening her chain. We plead with you to please follow up on this, as something needs to be done
