Comments: CASE UPDATE RECEIVED VIA EMAIL :

Syrex (INSP174667) - emaciation

I first reported this male, his female mate and two other dogs on the property on 3 April but was lucky enough to see Syrex and Virex when they slipped out the gate to come fetch food from me as their owners have said I may no longer feed them - if they are out of the gate, I will not deny them food as they are starving hungry and emaciated; PLEASE help these dogs instead of just seeing the state they're in and deciding that their owners are somehow doing enough.
