General comments

Upon my arrival, I met with NATAIJA. The birds were kept I side cages that was big enough for the amount of birds that were inside them and gave them enough space. They had access to water and a clean living environment. They had access to adequate shelter. They appeared in good health and condition.

The fish tanks was big enough for the amount of fish that it housed. The fish tanks were clean. The bigger fish tanks had environmental enrichment inside them. She explained that they use the filter pumps as hiding places in the small fish tanks since all of them didn't have environmental enrichment in them. All the fish appeared in good health and condition.

Petshop has complied
