Comments:	Worker came to gate and said there was no one home only himself and the maid and that the owner and his girlfriend was gone to work He then gave the owners number said that we must call the owner to schedule a time for us I phone over 4 times the number went to voice-mail and then it just rang Called the worker again and all of a sudden the owners girlfriend Lauren Thorne appeared came to talk to us and she said the owner was gone to his mother in hospital and his busy on the road Which I find very suspicious as if the owner is trying to avoid us Will follow up on friday
