EMERGENCY NO.: 081 855 0301

19 December 2024

Warning 2199 issued 14 December, Moringa Way Thornton

To whom it may concern.

Willow, Female, GSD, Chip nr. 933071000217855, was brought to my surgery after a warning was issued regarding her.

I just need to note that this particular dog was in no way identified by the inspector. He only referred to GSD Female. We request that more information identifying the dogs be given in future.

Willow (as identified above) was examined by me on 16 and 17 December 2024.

I can report as follow:

1. X-rays were taken of the hips; no abnormalities were detected.
2. Re wounds on lower back: skin scraping was done no parasites or fungi was observed. Apoquel and medicated shampoo was prescribed.

Fit for work; taking everything into account this dog is fit for work.
