Comments:	As per the WhatsApp discussions on the LE group with Tariq , he stated that there is no pregnant dog on the property. He also raised concerns about the number of animals present and the inadequacy of space to accommodate them. Additionally, he suspects that the residents may be involved in drug-related activities and are possibly using the dogs as a deterrent to keep SAPS away from the premises. I spoke with Mark L this morning, who confirmed that he had contacted the owner, Cameron, before visiting the property. During that call, Cameron informed him that the female dog is pregnant, and therefore the sterilisation would need to be postponed. However, Mark has not seen the pregnant dog himself and cannot confirm the number of dogs currently on the property. On Mark's initial visit in September, he observed one dog chained at the back of the property, but this was from outside the premises as no one was home at the time.
