Comments:	The owner, Mr Levy (ID: 4701265126085, 0829242439) was here this morning to lay claim to his animal. He completed the claimant form and said he wants his dog back. I explained the process to him and what we need first in order for the SPCA to consider that. He said his dog was at AWS in Philippi and he will provide proof thereof. I told him we will await the proof and contact him after our vets input as well and then decide from there. The owner said it would be best to call his daughter Nadia on 0691538384. Just after they left, I received a call from Jacques of AWS that said they are not happy with the owner because he failed multiple times to bring his dog back on their request. They even gave him a warning to say that if he does not bring the dog back for the senior vet to assess the dog then they would not give the dog chronic medication anymore. I asked Jacques if they could send us this and he said he will. Based on what Jacques told me, I believe we will not give the owner the option to get this dog back. He will have to decide if: - Surrender the dog and get a fine OR - we open a cruelty case against him.
