Inspector:	TREVOR RODNEY

Type:	CALL RECORD - MADE
Follow-Up Date:	2025-03-03
Comments:	I called the respondent Jackie / Jaqueline who had responded to my contact notice within an hour of me attaching it to the gate. She told me that she had been in/to the hospital and has been booked off sick for the rest of the week. She mentioned that thatere is a large bowl of water, behind the boat, which i saw, I just cound not see from the gate if there was water in it. She told me that there was another bowl of water at the back of the property in the shade, together with a food bowl and the dogs kennel. Apparently, we have been to this property before. She also mentioned that someone had fed the dog chicken bones, which is a huge concern, as there were chicken bones at the back on her property. I also saw grapes in the front of the property, and she is aware that grapes are toxic to dogs. She will be home for the rest of week, from 9am onwards as she first has to drop her kid off at school in the morning. She has not problem with us visiting the property for a GLC.
