Comments, if any:

Upon arrival, myself and Inspector Lwazi Ntungele of Cape of Good Hope SPCA met with the owner of the dog, Mr Ruben Mart, who granted us access to the property.

We observed an adult male Pitbull X breed dog, fair body condition but confined to its kennel. The area was clean and there was water but there was quite a bit of sand in the water bowl as well. The owner explained that the dog was confined for a bit as there was a hole in the fence but he closed it up earlier. I informed him that means he can let the dog out, which he immediately did. I told him that he should refrain from confining the dog to its kennel unnecessarily, as the fence was fixed already yet the dog was still confined to its kennel. I also told him that he will need to keep the water bowl clean so that the dog will have access to clean potable water.

I issued a warning, 21801, to:

- Let the dog roam freely immediately and refrain from confining the dog to its kennel unnecessarily.
- Provide the animals with sufficient potable water 24 hours a day, and ensure the water bowl is clean from sand and dust.

The warning was consigned by myself and Inspector Lwazi Ntungele. The warning was signed and accepted by Mr Ruben Mart.

I also administered dewormer for the dog, but could not do tick/flea treatment as it was raining. On follow up inspection I will arrange for the dog to be sterilized.
