Type:	CASE DISCUSSION NOTE
Follow-Up Date:	2026-01-30
Comments:	When the follow-up is conducted, please address the allegations that the dogs are not allowed out of the enclosures. We have received emails about this from the neighbour. The collie could also be stressed, aiding in the weight loss. The nails also appear to be long which could mean the dog does not get enough time outside of the cage. This will be a final inspection. If the owner did not provide adequate veterinary treatment (taking the dog to the vet) then we must consider a warrant. These dogs are high energy and you can see their condition deteriorating. If they are confined to the cages for 100% of the time then the owner should not have them.
