Subject: Re: Urgent plea for caged Border Collie

Thank you Inspector Rudi!

The information that I have is that the Border Collie is locked up 24/7 and is not being let out or exercised. I am wondering whether inspections can be done at random times during the day to check the owner's claim that they are not caged permanently?

There are now Boerboel cross Border Collie puppies, more animals in the cramped cage and more mouths to water and feed.

I am getting desperate to resolve this.
