Comments by Inspector: At aproxamitely 12H53 myself and inspector davids , was given access by manager Khaali
It was quite there was no sales taking place because most of there life stock was sold
They had plus minus 20 cattle that had access to food and water
The cattle appeared to be in a fair condition There was no over crowding observed

We then observed the goats they where plus minus 30 they had acesss to adqaute water and shelter and food

Then there where aproxamitely 20 sheep who appeared to be in a fair condition
They had access to adquate water And food And shelter

They then had one sale a white buky , that came to buy a goat , the staff handled the goat properly and also blind folded it so it doesn't stress and loaded correctly into the buky there was enough ventilation and space for the goat
The saleyard was again very quite
For now case can be finalized
