Comments:	I went back to the property to collect the dogs as the colection officer was too busy and I was worried about the mother dog that appears to be in bad condition. On return the Collie cross was not at home and we had looked for it everywhere and did not find it. I collected the mother dog, Admission No. A106038 and also filled the admission form for the Collie cross Admission No . A106039. Can the collection officer follow up on this collection and the admission form was filled and left with the owner .
