Comments:	Metro police went out on the 27th contravention notice was issued, and fines were issued. However, they did not see anybody slaughtering the animals on site because the call was attended late afternoon. The complainant came in today and mentioned that she drives in that area, and every Friday morning, these people stand on the road with the sheep skinning it; she is not sure if they are being slaughtered there on the side of the road. I do think that we need to stop off there next week friday morning, early, and monitor the situation with Aux LE officers present.
