Comments:	This is a final inspection that needs to be conducted. The owner has complied with the requirement to treat the animal’s skin condition. However, during the previous visit, it was found that there was no adequate shelter for the dogs and that the living environment was unhygienic. The assigned inspector is requested to conduct a follow-up inspection and specifically check the following: 1. Shelter – confirm that adequate and appropriate shelter is in place. 2. Skin condition – assess the current condition of the animal and confirm improvement or ongoing treatment. 3. Living environment – ensure the area is clean, safe, and suitable for the dogs.
