Patient Chart for Storm

Date: 17/08/26, Time: 4:57p

Client: MR CV Jacobs

Page: 5

Date	Time	By	Code	Description	Qty (Variance)
				- BEHAVIOUR / ENERGY CHANGES: Reportedly Subdued - Gave and inj for pain yesterday and she is a bit more comfy but not great - at least getting out of the kennel	
				ROUTINE CARE: - Vaccinations UTD (Y/N): Unknown (Wife's dog) - Antiparasitics UTD (Y/N): TF beginning of Jan (Nexgard); No dewormer given - Sterilised (Y/N): Y - Nutrition: As above	
				Abnormalities Noted on Exam: - Painful LFL; obvious swelling around the elbow; soft tissue, firm but not hard; no signs of obvious wounds such a bite wounds. - Difficulty standing and maintaining weight - suspect very painful joints; Osteoarthritis and arthrosis very likely. - Patient is geriatric - Coat is dull - Tachycardic - Subdued, cannot stand for long but moments of energy short lived - Alert and responsive	
				Diagnostics (if applicable): Recommended Geriatric work up focused on pain management: - admit on IVFT - Rads of major joints, especially forelimbs - Basic geriatric screening bloods to assess organ function	
				PLAN / NEXT STEPS: - O requested Pre-auth from Oneplan which will determine the extent of our work up - Costs are limited - Keep pet comfy and BWT until we know what funds we have avail - O made it clear he cannot afford treatment so we are very dependent on the Insurance - O will email the drug injected yesterday to reception	
				Clinical Exam Findings: T - 39.1 P - 140 R - 40 MM - PMG, CRT 2sec BCS - 3/5 Other - Mild dehydration; ongoing chronic pyoderma (as is typical of the breed) Hydration, Lnn, Derm, MSK, Neuro, Urogenital, Behavioural and Ocular all WNL	
				Update: patient ended up going home due to costs not being able to be covered by OnePlan; Recommended refer to AACL and recommended Paracetamol and Epleptin to be given the next week (as dispensed)
