Type:	CALL RECORD - MADE
Follow-Up Date:	2026-08-13
Comments:	Prior to attendance I contacted the complainant, Glen 082 881 8004, at 12h07 as per her instruction. She reported seeing a dog tethered with a long chain at the fruit stall. She was unhappy with the dog being chained and stated that dogs cannot be kept at a fruit stall. She was also concerned that she did not see water. I explained to the complainant that the reason for tethering is due to no proper fencing at the premises. I further advised that the premises are permanently occupied and that the dogs roam freely inside the fruit stall when it is closed at night, therefore they are not abandoned. Complainant was still concerned about space. I explained that in terms of the Act, an animal must be able to stand, stretch up and turn around in its shelter/area. There is no specific prescribed size. I advised that if the matter were to escalate to court we may not have a strong case. Complainant stated she does not want the matter to go further and only wants the people to be educated and encouraged to look after the animals.
